MALINKÉ PRODUCTIONS · LET'S AUTOMATE THIS SH*T.

KEEP THIS PAGE · MALINKEPRODUCTIONS.COM/AUTOMATE
PICK THE ONE YOU ALREADY USE. KEEP ADDING TO THE SAME FOLDER OR ALBUM.

Let's automate this sh*t.

Set it up once. Go live your life. Everything you add after that reaches us.

Pick the one you already use:

GOOGLE DRIVE

Google Drive folder (our favorite).

Make a folder, share it with team@malinkeproductions.com as Viewer, drop things in whenever.

Step 1	Make a folder in Google Drive.
Step 2	Share it with team@malinkeproductions.com as Viewer.
Step 3	Drop things in whenever.

DROPBOX

Dropbox folder.

Same idea: one folder, shared with us.

Step 1	Make a folder in Dropbox.
Step 2	Share the folder with team@malinkeproductions.com.
Step 3	Drop things in whenever.

ONEDRIVE

OneDrive folder.

Same again.

Step 1	Make a folder in OneDrive.
Step 2	Share the folder with team@malinkeproductions.com.
Step 3	Drop things in whenever.

GOOGLE PHOTOS

Google Photos shared album (Android, or anyone on Google Photos).

Make an album, share it, send us the link once.

Step 1	Make an album in Google Photos.
Step 2	Tap Share, then Create link, then Copy.
Step 3	Send us the link once, through the form or your checklist.

Step 4 Keep adding to the same album.

Play the phone animation on the web page.

Share the link once, from our film. Tap play.

IPHONE

iPhone shared album.

Make one album called For Malinké, send us the link once, keep adding. New albums on iOS 27 share full-size files; older albums send smaller copies, so for those use a folder instead.

Step 1 Open Photos, then Collections, then Shared Albums. Tap +.

Step 2 Name the album For Malinké, choose your pictures, then tap Sharing Options and Done.

Step 3 Open the album, tap Manage Shared Album, then Copy Album Link. Send us the link once through the form or your checklist.

Step 4 Keep adding: select a picture in Photos, tap Share, then Add to Shared Album. Choose For Malinké and tap Done.

Play the phone animation on the web page.

The shared album with Just added, from our film.
Tap play.

WHAT HAPPENS NEXT

Adding something doesn't post it anywhere. It only reaches us.

IF IT DIDN'T WORK

Use a folder instead.

New albums on iOS 27 share full-size files; older albums send smaller copies, so for those use a folder instead.

Send us your stuff.
